

Down Syndrome Child and Lip Trainer Patakara – a remarkable story of recovery!

Reported by:

Mrs. Sanae Tsutano, a Mother of the Down syndrome boy (Daichi), Nagoya, Japan.

Mar 2004

May 2004

Oct. 2000

*Baby (Daichi) was born with Down syndrome. Weight 2,740g (6.04 lbs)
It was found that he had a hole in the heart (ASD) and had an operation
when he was 8 month old.*

Oct. 2004

Started Patakara® exercise

For the first 2 weeks, he could not exercise well with the device.

One month later, he could use the device and exercise properly by himself.

Nov 2004

Jan 2005

Feb. 2005

*Expand capability with mother's help. He could carry out what he could not
manage before. Could listen to what people say and took action accordingly.*

May 2005

Sometime slept facing up (not sleeping side way).

Started etching pictures such as human face finely when he had the chance to make a drawing.

Jul. 2005

Could start reading characters (Japanese syllabary: hiragana)

*Could pedal up a rapid sloping road and manage to pass thorough obstacles smoothly,
even when it's very narrow for someone to get through.*

Aug. 2005

Could keep the rhythm to play a drum.

Aug 2005

Oct. 2005

Beginning of understanding on mathematics that was difficult for him previously.

Could understand numeric character 1~10 only.

Started reading a book.

Jan. 2006

Increased duration of facing the ceiling substantially during sleep

Apr. 2006

Became skillful enough with his fingers to manage small manual operation.

Started writing characters (Japanese syllabary: hiragana) and his name as well.

He started to manage mathematics that was difficult for him previously.

He was admitted to enter normal primary school in Nagoya, Japan. He is studying there.

Lip Trainer Patakara® supports your child with a simple device to strengthen facial expression muscles to become a nose breather for good health. It increases cerebral blood flow to create newborn synapses for the transformation of mental level and capability.

Our true goal is to help down syndromes children go to normal schools like others who had achieved it. There is genuine hope for every child.
